London, 20th April '11
Subject: repair Nissan GT1

Dear Mister Vijverman,

We are grateful that you have shown interest in the repair of the unique race car of one of our customers. Due international insurance agreements and with respect to European legislation we have to make the repairs to the car in the country where the damage was caused.

As we act as insurance company for Nismo Motorsports worldwide and having local partnerships in the countries where Nismo is active we inform you that Schadeconsultancy VDHB is our representative for Belgium, with as general manager Bob Vandenholt.

After your request for information about the chassis number of this Nissan GT-R GT1 we confirm hereby that the 09-0001 is the car with damage you have seen on the photos.

Considering the damage we are interested how your company is going to do the carbon composite repair on the car. Does your respected company have previous experience on this matter? Can you show us references from the past?

Attached you will find a translation of this letter.

Looking forward to your early reply and repair budgets,

Yours Sincerely,
Nissan Insurance Worldwide Ltd.

Mark Reijnders
Head of Global Affairs
